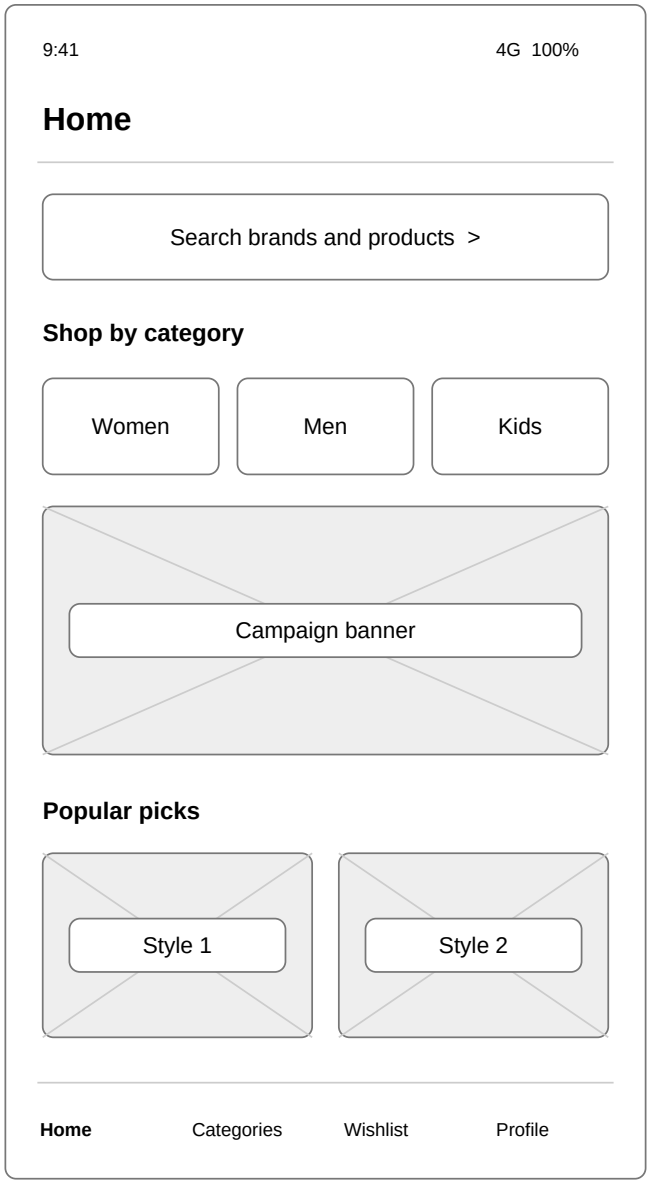
Myntra Shopping App Wireframe

Low fidelity concept for a fashion shopping journey. Boxes with diagonals represent images.

Home > Search > Products > Product details > Bag > Address > Payment > Confirmation

Side paths: products > filters; product details > wishlist > bag.

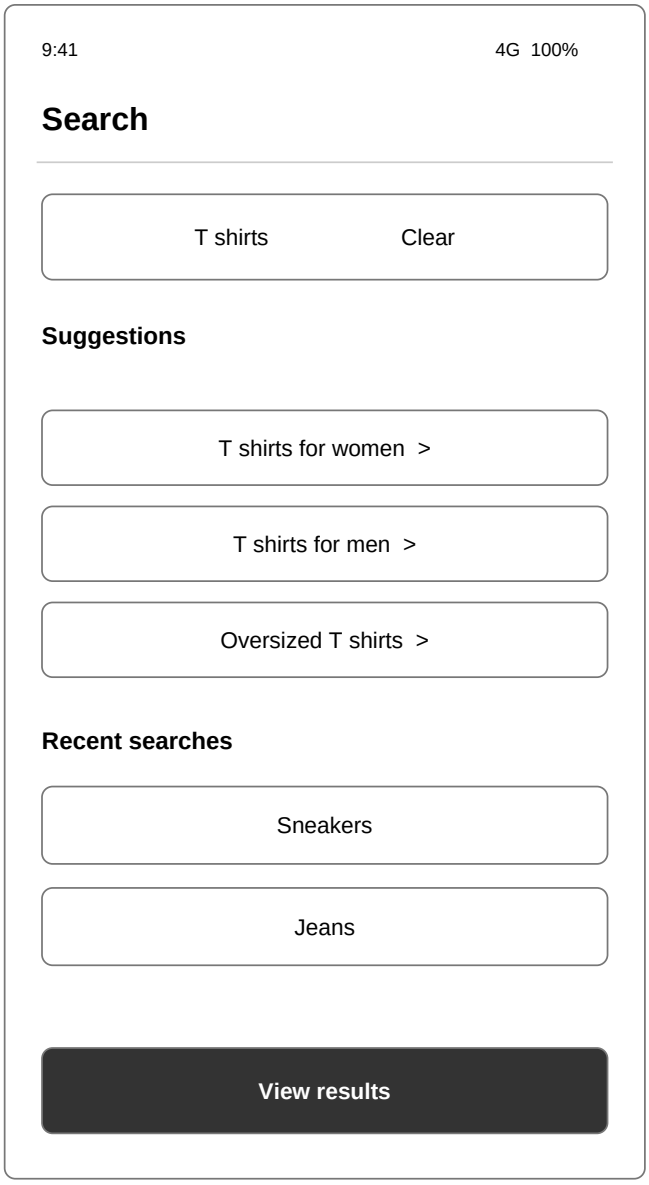
01 Home



Home

Tap search or a category to browse. The bottom navigation opens categories, wishlist or profile.

02 Search



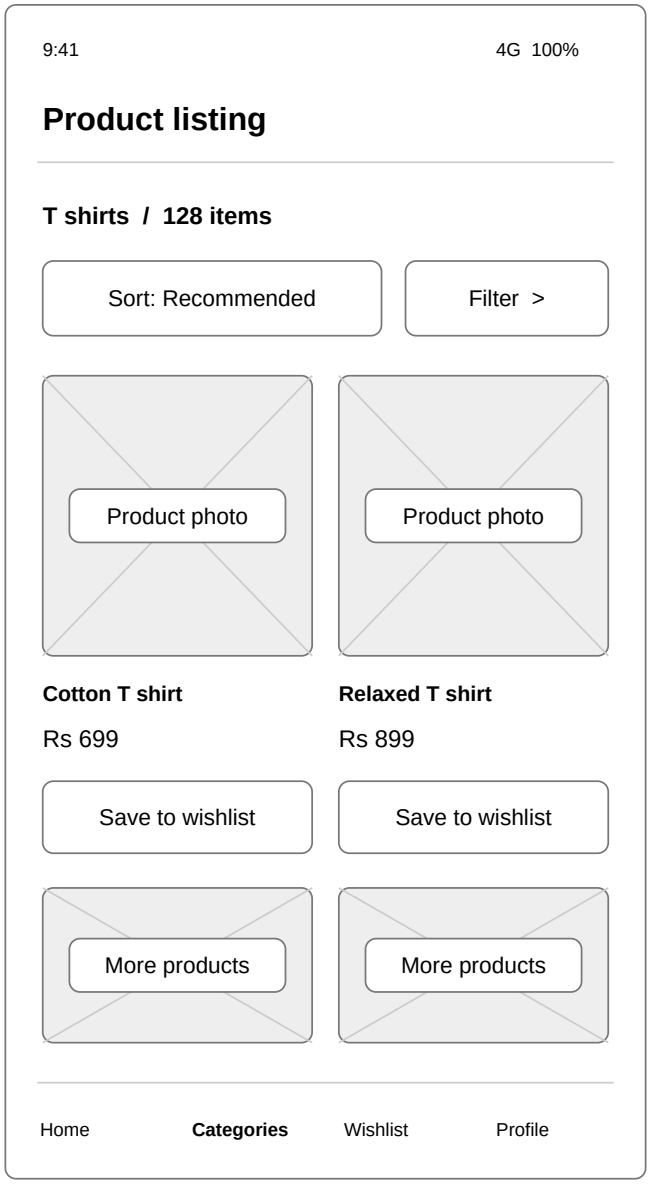
Search

Selecting a suggestion or View results opens Screen 03. For no matches, offer spelling tips and popular categories.

Browse and refine

Help shoppers compare products and narrow the results.

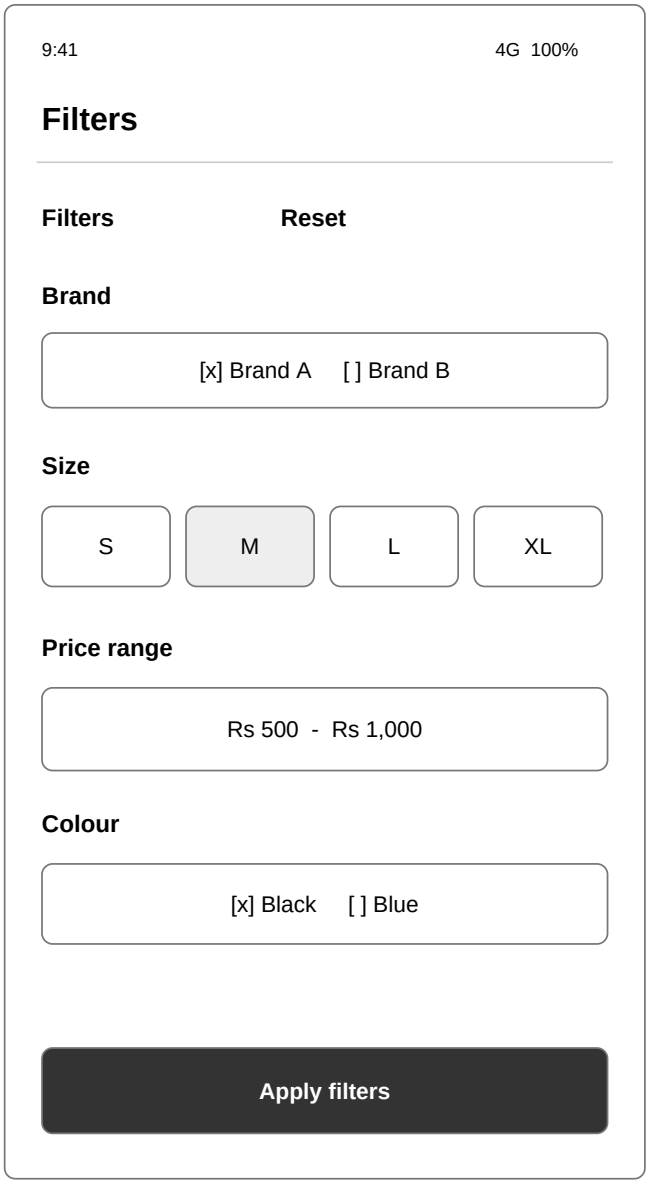
03 Product listing



Products

Tap a card to open Screen 05. Sort changes the order; Filter opens Screen 04. A save action adds the item to the wishlist.

04 Filters



Filters

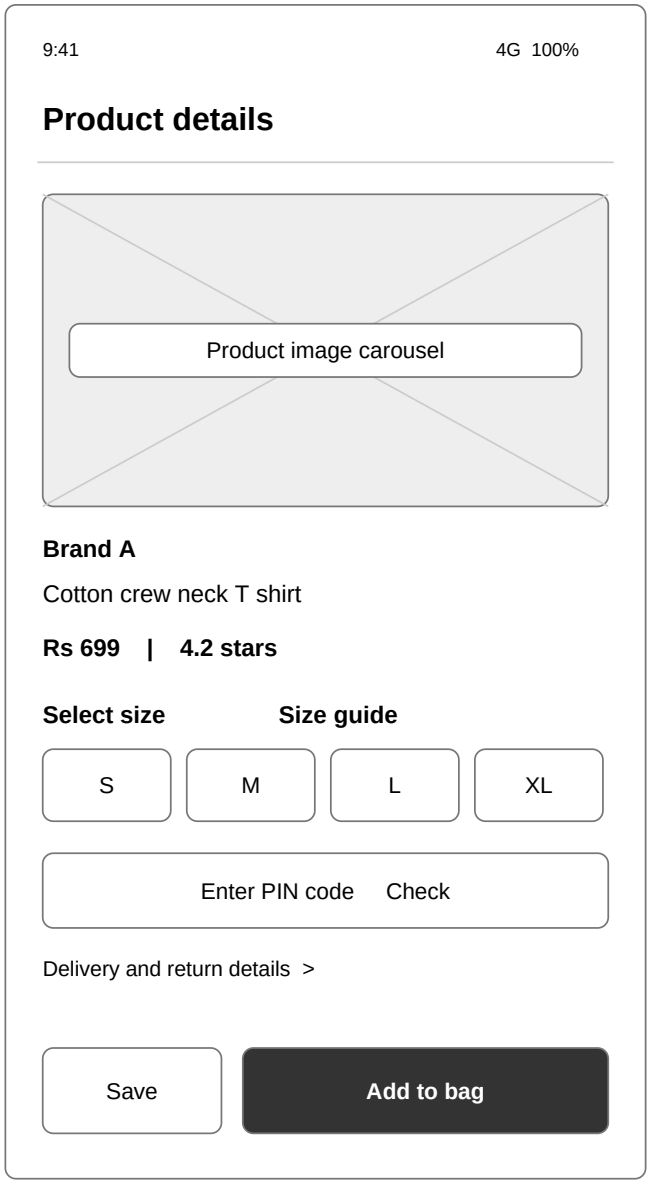
Selections remain pending until Apply filters. Reset clears selections. Returning to results preserves the search and shows active filters.

Choose and save

Make size, delivery and saved products easy to find.

3 of 5 | Choose and save

05 Product details



Product details

Require a size before adding to bag. Confirm the addition and provide View bag. Show unavailable sizes and inline PIN code errors.

06 Wishlist

Wishlist

Save products for later. Move to bag requires an available size; retain the item and explain if the product is out of stock.

Review and deliver

Confirm the purchase and choose a delivery address.
